Mr. John O'Hara
% Corporation Physics
Kearny High School
336 Devon Street
Kearny, NJ 07032

Dear Mr. O'Hara:

Please accept my personal thanks for contributing so significantly to the information presented to the School-to-Career/Employment Service educator-interns this past Friday, July 30, at the Department of Labor's Trenton central office. Ms. Hoeman of my staff informs me that this is the second consecutive year in which you have come to Trenton to address our cadre of educators as they are oriented to the school-to-work education reform movement. Your classroom techniques for imparting a knowledge-base of physics is an outstanding example of the imaginative integration of academic subject matter and real-world relevancy.

The many awards and recognitions you have received from both within and outside the realms of pedagogy acknowledge your full commitment to the effective promotion and implementation of the Corporation Physics concept and its many subject-specific variations. I know that students in the Kearny public school district and elsewhere throughout the state are better prepared to successfully enter the world of work due to your years of service to them and their communities.

I wish you continued success in your various educational endeavors. If I may be of any assistance to you in the future, please do not hesitate to contact me at 1-609-292-6852.

Sincerely,

Brian Peters, Director
Division of Business Services
