

Corporation Learning

Getting Down to the Business of Learning

Professional Workshops & Training Seminars

for:

Teachers

Counselors

Administrators

Parents

Students

Teachers-in-Training

Junior Colleges

Community Colleges

Colleges

Universities

Learn how Corporation Learning, in conjunction with the Core Curriculum Content Standards, the Workplace Readiness Standards and the Career Education, Consumer, Life and Family Skills Standards can:

- ✓ raise student achievement.
- ✓ have a positive impact on teaching.
- ✓ show you how to become dynamic and engaging presenters.
- ✓ teach your students how to become dynamic and engaging presenters.
- ✓ show you how all students can achieve at high levels.
- ✓ advance the skills and performance of all teachers and school leaders.
- ✓ involve special needs students in the “business of learning”.
- ✓ provide the tools necessary to make it all happen.
- ✓ provide support through eCoaching and monitored web based discussion groups for teachers and students.
- ✓ provide visitations when feasible to speak with teachers and students about the Corporation Learning pedagogy.

During the workshop you will learn:

- ✓ how to use technology to teach in addition to teaching students how to use technology to learn.
- ✓ how to give students the workplace readiness skills they will need for the 21st century.
- ✓ how to be a more effective and influential teacher.
- ✓ how empowering students can reduce stress and bring back the joy of teaching.

When you’ve completed the workshop you will think about:

- ✓ reinventing instead of retiring.
- ✓ using successful business practices that will transform your classroom into a dynamic, student-focused learning center.
- ✓ replacing the “I lecture-you listen” method of instruction with student participation and learning.
- ✓ how your students will grow when they learn that rigor, responsibility, and respect are as important as reading, writing and arithmetic.

Meet the Presenter

John O'Hara has been teaching high school for more than thirty-five years. Several years ago, unhappy with the lack of interest, enthusiasm and academic ability of many of his students, John focused his energy on implementing successful business techniques such as empowerment, collaboration, character education, and critical thinking in his classroom. He reengineered his physics classes to incorporate these concepts and later developed working models for the seven NJ Core Curriculum Content areas of instruction.

In 1997, John received a Best Practice Award from the NJ Department of Education for Corporation Physics. He has received many teaching awards including Princeton University's Distinguished Teacher Award, the NJ Business Coalition for Education Excellence Award and the Governor's Teacher Recognition Award.

John is a Registered Professional Development Provider (#425) for the NJ DOE and trains administrators, teachers, parents and students in the Corporation Learning pedagogy. He has presented to school districts throughout the State. His lively presentations are always informative, interesting and fun for everyone.

What do others say about Corporation Learning?

Leo Klagholz, (former) Commissioner of Education, NJ DOE: *"I will indeed think often about Corporation Physics because I will be talking about it in the courses I will teach."*

Nancy Hazelgrove, NJ DOE *"I am so impressed with how you designed and facilitated this incredibly creative instruction."*

Carol L. Hoeman: NJ Dept. of Labor: *"I was so very impressed by your student's presentation of Corporation Physics at the School-to-Careers conference."*

Barbara and James P. (Parents): *Words cannot express our thanks for your hard work and dedication to the students. Frank will always remember the wonderful year of Corporation Physics."*

Teacher comments: *"Highly motivating speaker, phenomenal program. Extremely interesting way to run a class - loved it - gave me great ideas. Very interesting and informative. Fun! It's the way of the future. This should be a required workshop for all teachers."*

Student comments: *"When we had to give oral presentations in other classes it was easy because of Corporation Learning. Every school should have a corporation....Corporation Math....Corporation English...Corporation everything....I love Corporation Physics"*
